Serial No.	09/291,798	
Filing Date	April 14, 1999	
Group Art Unit	2662	
Examiner Name	David E. Odland	
Attorney Docket No.	100,108US01	
Title: REDUCED POWER CONSUMPTION IN A COMMUNICATION DEVICE		

Box AF
 Commissioner for Patents
 Washington, D.C. 20231

In response to the final Office Action mailed October 22, 2002, please enter the following amendments and consider the accompanying remarks.

IN THE CLAIMS

Please amend the following claims.

sub c' >
 1. (Twice Amended) A method for controlling power consumption in a communication device, the method comprising:

powering down at least a portion of a receiver of the communication device for a selected period of time in response to an indication from a data source that a data transmission has ended;

powering up the at least a portion of a receiver to check for incoming data when the selected period of time expires;

receiving one or more packets, and

wherein powering up the at least a portion of a receiver comprises powering up in time to allow detection of an attempted retransmission of a packet.

Please cancel claim 2 without prejudice or disclaimer.
